

# Join Our Research Project

**We are researching how 3D technology can help young people of black and minority ethnic backgrounds to access mental health and counselling services and we want you to be part of the research team!**

## As part of the research team, you will

- Learn about and use a 3D virtual environment with an avatar
- Participate in sessions with a student therapist to help them understand the needs of autistic young people
- Share your ideas and views about the ways the tech is helpful and can improve the experience

## You'll need

- A laptop or PC
- To attend an initial induction and orientation
- To participate in 6 sessions with a student therapist
- To share your thoughts and feedback

Project runs from October 2022 to March 2023
